

Seminar 3 Preparation

In the seminar this week, you will be taken through a worked example of a web information system using UML diagrams to model designs of the security requirements of the threats identified in the week 4 seminar.

Seminar 3 preparation:

1. Review the recording of seminar 2 (unit 4)
2. Try developing a UML diagram using the Visual Paradigm tool to model at least two of the designs discussed in the seminar

Two UML diagrams have been drawn for the PAC's systems:
