

Feedback for RRMP Research Presentation [Formative]

Tutor completing formative feedback: Karen Outram	Student number: Zihaad Khan
Details of any extensions etc:	Submission Attempt: Formative

Thank you very much for submitting your formative Research presentation proposal on time.

The formative is laid out very professionally, with a good list of references at this time in evidence.

There is a clear title page denoting your research subject intention, and this is good practice. Noted you have also bracketed full word interpretation of the acronyms you have used for content in your formative, and this is good practice. You must assume when writing academically that the person reading the content knows nothing about your subject, and so providing full context, as above is appropriate. In the actual summative itself ensure that regular citation takes place in the oral presentation, on the power point and in the transcript.

On the point of acronyms; you do have acronyms in your title and so ensure that in the title itself, you bracket the full words that represent the acronyms so that everything is clear right from the beginning of the summative.

Noted that you recognise the study is to be from existing secondary literature only, this is good practice.

From your aims and objectives the formative indicates that the summative will have a focused study context and this is good practice to ensure that deep research takes place.

Research methodology is clearly laid out, * any engagement with primary research will be completed only if/when this project is taken forward for the Capstone project; you can mention primary research 'intentions' in this summative, but no primary research of any description is to be engaged with through this summative, [reflecting on the ethics discussion in your formative].

Good timeline info-graphic presented in the formative. If this is something to be developed and carried forward for your Capstone project, your supervisor will take that discussion up with you, [regarding time-lines, research content and context etc], when that time comes.

The very best of luck now as you move towards your summative,

With best wishes

Karen
